**Subject:** RE: Draft comments on the IRM work plan  
**Date:** Monday, April 07, 2014 4:52:02 PM

---

Mike,

Ms. Jump and I talked several times last week regarding the comments on the Draft IRM workplan. We also talked several times today regarding our concerns. After our conversation, we agreed that all my concerns have adequately been addressed by Ms. Jump's comments. One thing I would like to draw your attention to Ms. Jump's comments no.12 (section 4, Page 16). There is no SAP, QAPP or reference to existing SAP and QAPP. It didn't explain all the analytical methods for closure. Tony Carmeli's email of August 8, 2013 to Ms. Jump and me detailed all the analytical methods and analyses. Dioxanes were added later. We are wondering how you will address this issue. SAP and QAPP became a part of the closure plan (per my letter of Oct. 10, 2013). You are required to follow the existing closure plan for bldg.. B,D, and J (Now B, D, C, and process are). If you want to have a conference call, Please let us know. Thank you.

Akhter Hossain; P.E

**Subject:** FW: Draft comments on the IRM work plan

Hello Akhter,

We received comments on the DRAFT IRM workplan from Chris Jump at EPA last Friday. As we are eager to resolve all agency comments and move forward with the corrective actions as soon as possible, I am writing to see if you have any comments that you intend to submit on this work plan. If Ms. Jump's comments adequately communicate any concerns that you have about the work plan, please send me a note indicating such. If you have additional comments, please forward them to the project team as soon as possible so that we can address all agency comments at once and move forward with a mutual understanding that all party's concerns have been addressed.

Sincerely,

Mike Stephenson

**Subject:** Draft comments on the IRM work plan

Marty and Mike-

Attached are draft comments generated for the work plan by EPA. Akhter and I will be talking on Monday, so this letter may change slightly based on our conversation, and there may be a few additional comments; however, the general content of comments presented should not change. I wanted to go ahead and get these to you so you could start thinking about how to address them. Let us know if you would like to have a conversation to discuss the comments. I should be available most of next week.

Chris Jump, L.G.

Waste Remediation and Permitting Branch

US EPA, Region 7
